

PURICELLI

SUSTAINABLE SURFACES

Sub-brand

K&B is the collection made by Puricelli specifically for **kitchen and bathroom** environments. A unique proposal designed to meet the essential needs for the creation of work tops and furnishings: resistance, waterproofing, antibacterial properties, heat resistance, ease of cleaning and maintenance.

A perfect fusion of aesthetics and functionality, this collection is the result of over 70 years of experience in HPL laminate production and a thorough study of key trends, leading to a series of original aesthetic solutions. The finishes and decors are carefully selected and matched to make the most of the combination of design and technique, which finds full expression in an extremely modern and versatile collection.

Applications

- **Work tops:** solid and durable bathroom and kitchen work tops with even more textural effect and harmonious design, thanks to its core made of color paste.
- **Walls:** Compact Wall antibacterial and resistant to water, steam and the most difficult stains.
- **Cladding:** support panels for furniture making.

A strong point of the K&B collection is the availability of **extra-large format** HPL COMPACT panels for work tops. These large sizes allow for use in extensive projects without the need for joints. Despite their size, the panels are transportable and workable with no risk of breakage. This feature makes them highly competitive with large panels made of marble, ceramic, glass and mineral materials, which are known to be more delicate.

Size and thickness

12mm

4200 X 1620
4200 X 1310

4mm

4200 X 1620
4200 X 1310

0,7mm
