

PURICELLI

SUSTAINABLE SURFACES

A.BAC Technology

A.BAC is the solution created by Puricelli to **reduce the risk of infection due to contact with surfaces.**

Manufactured with an innovative treatment formulated to **inhibit the growth of bacteria over the entire surface** and reduce existing bacterial load by over 99%. Laboratory tests have demonstrated the efficacy of the product even with bacteria strains such as Staphylococcus Aureus and Escherichia Coli, which are responsible for a wide spectrum of infections and disease.

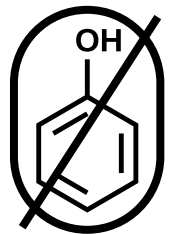

Ideal for constructing surfaces in indoor spaces subject to high-exposure risk and other critical spaces such as microbiological laboratories, hospitals and operating theatres, but also other collective spaces such as hotels, restaurants, bars and public areas.

All the products of the A.BAC range have an easy-to-clean surface that is also safe for contact with foodstuffs.

Certifications

Through its commitment to sustainability and its goal to minimise the impact of production on the environment, the Puricelli Group is conformant with the most stringent quality standards, and its products are certified in accordance with the latest standards and regulations in effect in each individual market. Creating liveable environments with every care and attention for the well-being of persons is the core goal of our research operations, the results of which are clearly evident in our production process.
